SUMMARY

- Full-Stack Developer (TypeScript, Python) who improved development efficiency through Automation Engineer role and project.
- Effective communicator who liaised between students and university executives as a UNSW Academic Board Member.
- Proven problem-solver who automated internal company processes with Python through Automation Engineer role.

EDUCATION

Master of Information Technology in Artificial Intelligence Jul 2025 - Dec 2026
The University of Melbourne, Melbourne

Bachelor of Science in Computer Science (Artificial Intelligence) - Distinction Sep 2022 - Dec 2024
The University of New South Wales, Sydney

WORK EXPERIENCE

Academic Tutor (Machine Learning & Data Structure) May 2025 - Present
CPU Education

- Teach introductory Machine Learning (mathematical foundations and basic models) for university-level students.

Junior Automation Engineer Nov 2024 - Jun 2025
Shanghai Fanci Enterprise Management Consulting Co. LTD

- Developed Python-based batch folder and file management tools to automate Excel-related workflows, reducing repetitive handling time by over 80%.
- Built an automated document recognition and processing system using Python (Regex, Pandas) to extract and transform Excel data efficiently.
- Implemented a custom PDF conversion and batch printing solution integrating Python and system APIs, enabling one-click standardized document output.

PROJECT EXPERIENCE

Fanzi Integration Platform – File Processing Module Nov 2024 - Jun 2025

- Contributed to the File Processing branch of the company's internal automation integration platform, a Python-based desktop application designed to streamline document workflows.
- Participated in frontend, backend, and testing development, focusing on batch processing, Excel data parsing, PDF conversion, and custom printing automation.
- Enhanced system reliability and usability through iterative testing and debugging, improving overall file handling efficiency by over 80%.

Modern Team Evaluation System for Courses with Group Assessments Sep 2024 - Nov 2024

- Enhanced navigation bar and intuitive Stage Board design allow users to quickly access historical courses and stage data, reducing task completion time by approximately 40% and improving system usability.
- Implemented data visualization (e.g., progress bars, trend charts) and smooth UI transition animations, making web's interface more appealing and increasing user satisfaction with visual design by 90%.
- Utilized React to create a modular design supporting step-by-step form rendering (e.g., expandable/collapsible sections in the tutor feedback page), boosting development efficiency by 50% and ensuring smoother user interactions.

Traffic Sign Recognition Classifier Jul 2024 - Sep 2024

- The traffic sign classification system is for classifying traffic signs using deep learning techniques with enhanced accuracy and efficiency. To achieve high efficiency and accuracy, it uses some popular deep-learning object detection models: LeNet, YOLOv5, and VGG.
- Wrote black-box tests using Jest in dedicated test files to validate API endpoints and core functionalities, ensuring system reliability and smooth deployment.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, TypeScript, Shell

Front-End Development: HTML5, CSS3, React, Tailwind CSS, Figma

Back-End Development: Node.js, Express, TypeScript, JSON, Postman

Deep Learning & AI: TensorFlow, PyTorch, Keras, Scikit-learn (CNN, RNN, Transformer models), Cursor

Databases: SQL, PLpgSQL

Version Control: Git, Jira

Cloud: AWS

Additional Tools & Technologies: Adobe Photoshop, Adobe Premiere Pro, Adobe Audition, Xmind, netLogo

EXTRACURRICULAR EXPERIENCE

Member of UNSW Academic Board

Nov 2023 - Nov 2024

- The University of New South Wales
- Advises the Vice-Chancellor and Council on university's conduct and standards of teaching, scholarship and research.
- Meet with the Head of School and Executive to provide feedback.
- Liaises with the faculties and makes recommendations to the Council.

UNSW CSE Stureps Member (Student Representative)

July 2023 - July 2024

UNSW Computer Science And Engineering

- Deal with complaints, questions and feedback from UG or PG and research students. Help to improve the COMP1531 COMP2521, COMP3121 class experience and course quality, etc.
- Meet with the Head of School and Executive to provide feedback. Participated in 2023 and 2024 CSE department's beginning of the year full staff meeting, and the end of the year full staff meeting.
- Maintain the Stureps webpage.

LANGUAGES

- English - Competent
- Mandarin - Native

AWARDS

2022 & 2023 Australia's Global University Award

The Australia's Global University Award by UNSW Sydney offers significant financial support of up to \$10,000 for international students, recognizing outstanding academic achievements and enhancing university's global diversity and academic excellence.

2023 & 2024 College Scholar

College Scholar is a prestigious academic recognition awarded to students at Warrane College, affiliated with UNSW. This honor recognizes students with a distinction average in academic, exceptional leadership, and contributions to the college community.
