EDUCATION

Master of Information Technology in Artificial Intelligence Jul 2025 - Dec 2026
The University of Melbourne, Melbourne

Bachelor of Science in Computer Science (Artificial Intelligence) - Distinction Sep 2022 - Dec 2024
The University of New South Wales, Sydney

WORK EXPERIENCE

Full-Stack Developer Nov 2024 - Present
Shanghai Fanci Enterprise Management Consulting Co. Ltd, Shanghai, China

- Develop Python-based batch folder and file management tools to automate Excel-related workflows, reducing repetitive handling time by over 80%.
- Build automated document recognition and processing workflows using Python, regular expressions, and Pandas to extract and transform Excel data efficiently.
- Contribute to a custom web-based CRM system that supports internal business process digitisation and improves operational efficiency.

Software Developer Intern Jan 2026 - Apr 2026
Untapped Talent, Melbourne, Australia

- Designed and delivered full-stack features for the UntappedMe self-awareness and learning platform and a game-based team enablement system using Next.js, React, TypeScript, and Firebase.
- Built and integrated an LLM-powered chat system covering backend orchestration, knowledge retrieval, and structured response flows for interactive user guidance.
- Developed backend APIs and data pipelines with Next.js route handlers and Firebase services, including Firestore, Authentication, and Storage.
- Collaborated with stakeholders to translate product requirements into technical solutions and supported continuous deployment through Vercel and Git workflows.

PROJECT EXPERIENCE

UntappedMe Platform - AI-enabled Learning & Self-awareness System Jan 2026 - Apr 2026

- Developed a full-stack learning and self-awareness platform with profile management, search, and content-based learning modules.
- Implemented an LLM-powered chat system that provided context-aware guidance and recommendations to improve user engagement.
- Built internal administration features to manage users and content, streamlining platform operations and supporting ongoing iteration.

Fanzi Management Platform - CRM & File Processing System Nov 2024 - Jun 2025

- Developed key features for an internal CRM platform managing customer data, receivables, and income and expense tracking.
- Implemented full-stack functionality and automation pipelines for customer records, payment tracking, Excel parsing, PDF conversion, and batch printing.
- Improved system reliability and usability through testing and debugging, contributing to an overall workflow efficiency gain of more than 80%.

Traffic Sign Recognition Classifier Jul 2024 - Sep 2024

- Developed a traffic sign classification system using LeNet, YOLOv5, and VGG to evaluate deep-learning approaches for image recognition.
- Wrote black-box tests in Jest to validate API endpoints and core functionality, supporting reliable deployment.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, TypeScript, Shell

Front-End Development: HTML5, CSS3, React, Tailwind CSS, Figma

Back-End Development: Node.js, Next.js, Express, TypeScript, JSON, Postman

Deep Learning & AI: TensorFlow, PyTorch, Keras, scikit-learn (CNN, RNN, Transformer models), Codex

Databases: SQL, PL/pgSQL, Firebase, Supabase

Version Control & Cloud: Git, Jira, AWS

Additional Tools & Technologies: Adobe Photoshop, Adobe Premiere Pro, Adobe Audition, XMind, NetLogo

EXTRACURRICULAR EXPERIENCE

Academic Tutor (Machine Learning & Data Structures)

May 2025 - Present

CPU Education

- Teach introductory machine learning, including mathematical foundations and basic models, to university-level students.

Member of UNSW Academic Board

Nov 2023 - Nov 2024

The University of New South Wales

- Advised the Vice-Chancellor and Council on the University's standards of teaching, scholarship, and research.
- Met with the Head of School and executive staff to provide student feedback.
- Liaised with faculties and made recommendations to the Council.

UNSW CSE Stureps Member (Student Representative)

Jul 2023 - Jul 2024

UNSW Computer Science and Engineering

- Handled complaints, questions, and feedback from undergraduate, postgraduate, and research students to help improve course quality.
- Met with the Head of School and executive staff and participated in the 2023 and 2024 CSE full-staff meetings.
- Maintained the Stureps webpage.

LANGUAGES

- English - Competent.
- Mandarin - Native.

AWARDS

2022 & 2023 Australia's Global University Award

UNSW Sydney's Australia's Global University Award provides up to \$10,000 in financial support to international students, recognising academic achievement and contribution to the University's global community.

2023 & 2024 College Scholar

College Scholar is an academic recognition awarded by Warrane College, affiliated with UNSW, for distinction-level results, leadership, and contribution to the college community.
